

# HOW FLOWERS HAVE CHANGED THE WORLD

The Upper Merced River Watershed Council invites you to join flower enthusiast Vern Gersh in exploring the role of flowering plants in our changing world.

Charles Darwin called the evolution of flowers “an abominable mystery.” Take a journey back to a different world. Watch the earth’s natural history unfold. Find out how the simple flower brought forth the birds, the bees, and, most importantly, us.

Tuesday, June 22, 5:30 pm  
Midpines Community Hall  
6364A Highway 140, Midpines

There is no charge for this program.  
A donation of \$5 is suggested.

For persons requiring accommodations pertaining to the physical accessibility, sign language interpretation, or alternative formats, please contact the Watershed office 7 days prior to the event at 209-966-2221
